DETAILED ACTION

Status of Claims

Applicant's amendment, filed 10/11/2007 is acknowledged. Pending claims are 5 and 7-9. Claims 1-4 and 6 are canceled.

Response to Arguments

Applicant's arguments filed 10/11/2007 have been fully considered. The applicant has amended independent claim 5 to incorporate the allowable subject matter indicated as indicated in claim 6. The 112, second paragraph, rejections are withdrawn.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "7", "9", and "43", in Fig. 2 are mislabeled. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 5 and 7-9 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not reasonably teach, suggest or disclose a water separation unit having a filter member which allows only the solvent to pass to the solvent storage chamber and a drainage pipe having a vertical part for bringing the water from the tank to a level higher than the bottom part of the tank and a horizontal part located downstream of the vertical part, where the highest point within the horizontal part is lower than the upper end of the solvent recovery pipe.
